

BLB01

19" Rackmount cable Lacing bar

Product information:

The BLB01 rackmount cable lacing bar can be installed horizontally on the front or back of a 19" equipment rack to provide a secure mounting point to run cables. Attaching cables to the lacing bar will reduce the tension on your cables and prevent damage to the contacts on your rack-mount equipment.

The lacing bar will also provide a route for cables, which enhances passive cooling within your rack. This helps to ensure your rack remains at an optimal temperature, to extend the life of your equipment and minimize or eliminate downtime.

Product Features:

Dimensions	0.47 x 19.016 x 0.24 " (W x H x D)
Weight	0.20 lb
